Proceedings of the
Fifth Alvey Vision Conference

Conference Chairman Professor K D Baker
Technical Programme Chairman Mr G D Sullivan

AVC Organising Committee

C J Taylor
K M Crennell
W G L Adaway
M B Brown
B F Buxton
D Hogg
R N Kay
A C Sleigh
G D Sullivan

The papers in this volume are published without modification, as a record of the proceedings of the Alvey Vision Conference 1989. As such they represent the authors’ opinions and their inclusion in this publication does not necessarily constitute endorsement by the Organising Committee.

Abstracting is permitted with credit to the source. Isolated articles may be photocopied without fee for the purposes of private study or non-commercial teaching. For other copying, reprint or republication permission please contact the authors directly.

CONTENTS

SESSION 1: Model-based Vision

On Recognition of Object Categories
P Grossmann, GEC Hirst Research Centre

Hypothesis and Verification in 3D Model Matching
F P Sykes, S B Pollard & J E W Mayhew, The University of Sheffield

The Roll Angle Consistency Constraint
A D Worrall, K D Baker & G D Sullivan, The University of Reading

Polyhedral Object Recognition with Sparse Data - Validation of Interpretations
D Holder & H Buxton, City of London Polytechnic & Queen Mary College London

Model-based Recognition of Human Posture using Single Synthetic Images
C I Attwood, G D Sullivan & K D Baker, The University of Reading

Application of a User-Programmable Vision System to Inspection of Complex Assemblies
P W Woods & C J Taylor, The University of Manchester

Interpreting Line Drawings Using a Clustering Technique
R I D Cowie, T Hamill, P J Morrow & R H Perrott, The Queen’s University of Belfast

SESSION 2: Shape Representation

Derivation of "Natural Basis Functions" for a Group of Shapes
G Scott, The University of Oxford

Iterated Function Systems and Two-Dimensional Shape Representation
P A Giles, A Purvis, D Waugh & R Garigliano, The University of Durham

Geometric Constraints from Planar Surface Patch Matching
R B Fisher, The University of Edinburgh

Surface Description of Labelled Graphs
C J Davies, Queen Mary College London

Model Based Tissue Differentiation in MR Brain Images
P H Mowforth & J Zhengping, The Turing Institute

A Finite Element Method for Deformable Models
P Karaolani, G D Sullivan, K D Baker & M J Baines, The University of Reading
SESSION 3 : Tracking & AGV

Tracking Objects Using Image Disparities
A J Bray, The University of Sussex

Real-Time 3D Object Tracking
R S Stephens, Computing Devices Co Ltd, Eastbourne

SWITCHER: A Stereo Algorithm for Ground Plane Obstacle Detection
Y Zheng, D G Jones, S A Billings, J E W Mayhew & J P Frisby,
The University of Sheffield

Predictive Feed Forward Stereo Processing
S B Pollard, J Porrill & J E W Mayhew, The University of Sheffield

Predictive Gaze Control
C Brown, University of Rochester

Stereoscopic Tracking of Bodies in Motion
R Cipolla & M Yamamoto, The University of Oxford
& Electrotechnical Laboratory Japan

SESSION 4 : Image Features

Segmentation Using Region Merging with Edges
M Gay, British Aerospace plc

Edge Detection at Junctions
Du Li, G D Sullivan & K D Baker, The University of Reading

Spectre: An Improved Phantom Edge Finder
M M Fleck, The University of Oxford

A Novel Approach to Boundary Finding
R T Shann & J P Oakley, The University of Manchester

A Geometric Model for the Lumen of Blood Vessels in X-ray Angiography
C R Hardingham, D J Hawkes & A C F Colchester, Guy’s Hospital, London

Comparison of Approaches to Feature Detection
R W Series, C J Radford, M J Varga, P Fretwell & A C Sleigh, RSRE, Malvern

SESSION 5 : Texture & Hough

The Adaptive Self Parameterising Texture Region Boundary Tracker
D M Booth & J E W Mayhew, RIPC, RSRE, Malvern

Estimating Asymmetric Noise
A Noble & M Brady, The University of Oxford
A Dynamic Combinatorial Hough Transform for Straight Lines and Circles
V F Leavers, D Ben-Tzvi & M B Sandler, King’s College, London

A Comparative Study of Hough Transform Methods for Circle Finding
H K Yuen, J Princen, J Illingworth & J Kittler, The University of Surrey

Fitting Ellipses and Predicting Confidence Envelopes using a Bias Corrected Kalman Filter
J Porrill, The University of Sheffield

SESSION 6 : Shape from ...

Stereo-matching of Line-segments Based on a 3-dimensional Heuristic
with Potential for Parallel Implementation
R L Vergnet, S B Pollard & J E W Mayhew, The University of Sheffield
& Ecole Nationale Superieure des Telecommunications Paris

Stereo Matching of Curves
A T Brint & M Brady, The University of Oxford

Shape from Shading in the Light of Mutual Illumination
D Forsyth & A Zisserman, The University of Oxford

SESSION 7 : Shape from Motion

Rigid Velocities Compatible with Five Image Velocity Vectors
S J Maybank, Hirst Research Centre

Motion and Depth from Optical Flow
P Baraldi, E de Micheli & S Uras, Universita di Modena & Universita di Genova

Motion Segmentation from Optical Flow
A Verri, S Uras & E de Micheli, Scuola Internazionale Superiore
di Studi Avanzati & Universita di Genova

Algebraic Polyhedral Constraints and 3D Structure from Motion
D W Murray, The University of Oxford

Fast Recovery of the Optic Flow around a Closed Contour using Stabilised Regression onto Fourier Components
G Scott, The University of Oxford

SESSION 8 : Miscellany

Image Labelling with a Neural Network
W A Wright, RIPR, RSRE, Malvern

An Associative Processor Array Designed for Computer Vision
A W G Duller, R H Storer, A R Thomson, M R Pout & E L Dagless,
The University of Bristol
A Method for Retrieving Images from Noisy Incomplete Data
D Ustundag, N M Queen & J E Bowcock, The University of Birmingham

Edge Postprocessing - A Comparative Study
E R Hancock & J Kittler, The University of Manchester

An Intelligent Segmentation System for Lateral Skull X-Ray Images
D N Davies & C J Taylor, The University of Manchester

Parallel and Perpendicular Line Grouping in a 3-D Scene from a Single View
B Brillaut, City University

Chromosome Classification in a General Purpose Frame-based Interpretation System
D Pycock & C J Taylor, The University of Manchester

POSTER PRESENTATIONS

Optical Measurement by Back Projection
J P McTavish & J E W Mayhew, RIPR, RSRE, Malvern

Spline Smoothing: A Special Case of Diffusion Smoothing
Li-Dong Cai, The University of Edinburgh

Edge Recognition using Image-Processing Hardware
A M Mclvor, The University of Oxford

Shape from Contour Using Symmetries
S Y K Yuen, The University of Sussex

Phase from Zero-Crossings
K Langley, The University of Oxford

Image Processing Applications using an Associative Processor Array
A W G Duller, R Storer, A R Thomson, M R Pout & E L Dagless,
The University of Bristol

Investigating Invariant Pattern Recognition Using a Flexible Development Environment
J Austin & B N Brooke, The University of York

Economical and Cautious Approaches to Local Path Planning for a Mobile Robot
P Grant & P H Mowforth, The Turing Institute

Visual Conviction
J A D W Anderson, The University of Reading

Development of a Model for use in Medical Image Interpretation
M G Cawley & K Natarajan, Queen Elizabeth Hospital, Birmingham

APPLY: Machine Independent Image Processing Language and its Implementation on a Meiko Computing Surface
