British Machine Vision Association

BMVC90

Proceedings of the
British Machine Vision Conference
University of Oxford

24–27 September 1990
British Machine Vision Association

B M V C 9 0

Conference Committee

Conference Chair
Andrew Sleigh

Programme Chair
Andrew Zisserman

Treasurer
Robert Series

Local Arrangements
David Murray

Programme Assistant
Jennet Batten

Exhibition Organizer
Paul Beardsley

Programme Committee

W G L Adaway
M B Brown
B F Buxton
M C Fairhurst

D J Hand
D C Hogg
J Illingworth
J Kittler
P Mowforth

L Norton-Wayne
P Saraga
G D Sullivan
C J Taylor

Additional Reviewers

A Blake
S Cameron
R Cipolla
W Dickson
M Fleck

R B Fisher
D A Forsyth
C Harris
R Horaud
M Ibison
C Marinos

A Mclvor
S B Pollard
J Porrill
L Tarassenko
H Trivedi
Table of Contents

INVITED PAPERS

SESSIONS I and VII
Technology innovations and product design issues in machine vision:
The Technical Arts Corporation experience
   S White xi
On the computational neurobiology of curve detection
   S W Zucker, A Dobbins and L Iverson xvii

PAPERS

SESSION II: Model-based Vision 1
Transformational invariance - a primer
   D A Forsyth, J L Mundy and A Zisserman 1
Relative motion and pose from invariants
   A Zisserman, C Marinos, D A Forsyth, J L Mundy and C A Rothwell 7
Feature grouping in a hierarchical probabilistic network
   W Dickson 13

SESSION III: Stereo Metrology
Epipolar geometry for trinocular active range-sensors
   A Blake, D McCowen, H R Lo and D Konash 19
Optimal combination of stereo camera calibration from arbitrary stereo images
   N A Thacker, J E W Mayhew 25
Recovering partial 3D wire frame descriptions from stereo data
   S B Pollard, J Porrill and J E W Mayhew 31
Curve matching and stereo calibration
   J Porrill and S B Pollard 37

SESSION IV: Feature Extraction 1
Robust estimation of shape parameters
   G A Jones, J Princen, J Illingworth and J Kittler 43
Active intelligent vision using the dynamic generalized Hough Transform
   V F Leavers 49
A probabilistic approach to the Hough Transform
   R S Stephens 55
Shape verification using belief updating
   C J Taylor and D H Cooper 61

SESSION VI: Motion 1
Resolution of the Bas-relief ambiguity in structure-from-motion under orthographic projection
   C Harris 67
RAPID - a video rate object tracker
   C Harris and C Stennett 73
Kalman filtering of pose estimates in applications of the RAPID video rate tracker
   R Evans 79
Determining motion from 3D line segment matches: a comparative study
   Z Zhang and O D Faugeras 85
PAPERS continued

SESSION VII: Feature Extraction 2
Optimal probabilistic relaxation labeling
I. Poole
Construction of a scale-space primal sketch
T. Lindeberg and J. Eklundh
Feature grouping by 'relocalisation' of eigenvectors of the proximity matrix
G. L. Scott and H. C. Longuet-Higgins

SESSION VIII: Motion 2
Computation of discontinuous optical flow by domain decomposition and shape optimization
C. Schnörr
Towards qualitative vision: motion parallax
A. Blake, R. Cipolla and A. Zisserman
Using a combined stereo/temporal matcher to determine ego-motion
N. A. Thacker, Y. Zheng and R. Blackbourn
Integration of stereo and motion
E. Sparks and M. Stephens

SESSION IX: Medical Image Understanding
A model-based approach to the reconstruction of three dimensional arteries from biplane angiograms
S. T. Rake, K. D. Baker and G. D. Sullivan
Edge-region integration for segmentation of MR images
G. J. Brelstaff, M. C. Ibison and P. J. Elliott
Model-based interpretation of anatomical structures in cranial MR images
The use of the grey level SAT to find the salient cavities in echocardiograms
D. R. Bailes

SESSION XI: Applications and Hardware
Automatic inspection of surface mount solder joints using X-ray images
E. Griffiths and R. Jordan
A distributed blackboard system for vision applications
M. D. Brown and R. B. Fisher
A multiprocessor 3D vision system for pick and place
M. Rygol, S. B. Pollard and C. Brown
A fast algorithm for computing optic flow and its implementation on a Transputer array
H. Wang, J. M. Brady and I. Page
PAPERS continued

SESSION XII: Shape from X and Surface Reconstruction
Shape from texture: textural invariance and the problem of scale in perspective images of textured surfaces
   J V Stone
Calculating the surface topography of integrated circuit wafers from SEM images
   T P Ellison and C J Taylor
Integrating stereo and photometric stereo to monitor the development of glaucoma
   S Lee and J M Brady
Stereoscopic recovery and description of smooth textured surfaces
   P F Mclauchlan, J E W Mayhew and J P Frisby
Reconstruction of visual appearance
   P R J North

SESSION XIII: Model-based Vision 2
3-D object recognition and orientation from both noisy and occluded 2-D data
   D P Illing, P T Fairney and R J Wiltshire
Model based 3D grouping by using 2D cues
   S Zhang, L Du, G D Sullivan and K D Baker
3-D cues from a single view: detection of elliptical arcs and model-based perspective backprojection
   S Masciangelo
Using geometrical rules and a priori knowledge for the understanding of indoor scenes
   C Coelho, M Straforini and M Campani

SESSION XIV: Segmentation
Texture segmentation for defining driveable regions
   A Grunes and J F Sherlock
Extracting second-order topographic surface features from range data
   R B Fisher
Segmentation of planar curves using local and global behaviour analysis
   L-D Cai, J Porrill, S B Pollard, J E W Mayhew and J P Frisby
POSTERS

SESSIONS V and X

Combining cues for mammographic abnormalities
S M Astley and C J Taylor 253

Prediction of stereo disparity using optical flow
P A Beardsley, J M Brady and D W Murray 259

Model based segmentation of radiological images of the cranium
M G Cawley and K Natarajan 265

An empirical study on the effects of spatial discretization error in a stereo
vision system
K L Chan and A K Forrest 271

An uncalibrated stereo visual servo system
A Conkie and P Chongstitvatana 277

Depth extraction by focal/aperture variation
S R Daniel 281

An analysis of hole detection schemes
E R Davies and S P Barker 285

An intelligent visual task system for lateral skull X-ray images
D N Davies and C J Taylor 291

Classifying symmetry sets
M M Fleck 297

On recognition of features in polyhedral scenes
P Grossmann 303

Simultaneous region and edge segmentation of infrared images using non-maximal
suppression for edge thinning
J F Haddon and J F Boyce 309

Evaluation of a real-time kinetic depth system
G M Hayes and R B Fisher 315

Symbolic image matching by simulated annealing
L Herault, RHoraud, F Veillon and J Niez 319

Parabolic and hermite cubic finite elements: a flexible technique for
deformable models
P Karaolani, G D Sullivan and K D Baker 325

Digital or analog Hough Transform?
N Kiryati, M Lindenbaum and A M Bruckstein 331

Robust grouping of intensity changes in outdoor scenes by a histogram and graph based
method
A Korn 337

The computation of deformation and rotation in stereopsis
K Langley, B J Rogers and J M Brady 343

Filter based estimates of depth
S J Maybank 349

A test of camera noise models
A M McIvor 355

A head called Richard
P Mowforth, P Stebert, Z P Jin and C Urquhart 361

Integrating visual search with visual memory in a knowledge directed image interpretation
system
T P Pridmore and S H Joseph 367
POSTERS continued

Interpreting trihedral vertices by using assumptions about the angles between the edges
G Probert and R Cowie 373
Perceptual grouping of circular arcs under projection
P L Rosin and G A W West 379
A parallel path planning algorithm for mobile robots
C Shu and H Burton 383
Robust ego-motion estimation
D A Sinclair, A Blake and D W Murray 389
Active contours in medical image processing using a networked SIMD array processor
G D Sullivan, A D Worrall, R W Hockney and K D Baker 395
A knowledge based system for measuring faces
D Tock, I Craw and R Lishman 401
An application of active contour models to head boundary location
J B Wacte and W J Welsh 407
Fast object recognition using a hybrid optical/digital processor
D J F Walker and C R Chatwin 413
Segmentation coding using edge detection and region merging
Y Yu 419
